

RICAIP Seminar Series

OPEN IN SCIENCE

2. 11. 2021 | 9:00 – 12:00

online

Register on www.ceitec.cz till 12/10/2021

To attend the event online, you will receive the link to your e-mail before the event.

9:00 – 9:15

Introduction

prof. Pavel Václavěk

RICAIP Project Coordinator, CEITEC BUT

How do we understand the term “open science” in the context of the RICAIP Project?

9:15 – 10:00

Open Science – Practical Examples

Dr Pavel Tomančák

Director of the CEITEC Consortium

I will describe how I practised open science in the areas of reagents, software, hardware and ideas and how it impacted my scientific career.

10:00 – 10:45

The Role of Citizen Science in Open Science and Open Innovation

Margaret Gold

Coordinator of the Citizen Science Lab from Leiden University

Margaret Gold will give a brief introduction to the Citizen Science Lab at Leiden University. She will also talk about the role of Citizen Science in Open Science and ways of doing Citizen Science across the research cycle and innovation cycle, with examples. Don't miss also her interactive session reflecting on your own research and innovation practices in break-out groups, followed by plenary discussion and space for your Q&A.

11:00 – 11:45

Open Science 101: An introduction to concepts and tools of Open Science

Dr. Luiza Bengtsson

Science Transfer and Outreach, “Lab Meets Teacher”, ORION Project Training WP Leader from Max Delbrück Center in Helmholtz Association Berlin

This workshop will establish what Open Science is and why it is needed. We will particularly focus on the concepts of Public Engagement, giving you practical guidance and showcasing tools for incorporating it into your daily work.

11:45 – 12:00

Open Science at Brno University of Technology – Activities of the Central Library

Jan Skupa

Institutional Repository Manager from Central Library of Brno University of Technology

The presentation will describe the activities of the Central Library that support the principles of Open Science at the Brno University of Technology. Attention will be focused mainly on the activities of the library in the field of Open Access – management of the institutional repository or the Open Access Fund. Other topics will be e.g. assigning DOIs for records in the repository, setting up the ORCID system to the IS BUT or organizing seminars on Open Access, Defending against predator publishers, RDM and DMP, etc.
